**GO GREEN
SAVE EARTH**

Welcome...!

MY NANOBOT. MY DRINKWARE.

We take immense pleasure in introducing ourselves as manufacturer of stainless steel drinkwares. With save nature as our vital mission, we manufacture our products to last long. Preserving Earth is the prime key for all of us, all can be prevented by making a choice, switching to a reusable drinkware is the easiest way to do our part to save living organisms from fundamental health crisis caused to due microplastics and nanoplastics.

**LET'S DO THIS TOGETHER TODAY FOR
BETTER TOMORROW**

 **MADE IN INDIA**

OUR GROUP OF COMPANIES

RAJASTHAN GUM PVT.LTD.

- Incorporated in the year 1998 in collaboration with Economy Polymers and Chemicals USA. Company is engaged in manufacturing and exporting of Guar Gum Splits and Powder with an Installed capacity of 84,000 M.T. per annum and are the largest exporter of Guar Gum Powder in India.
- Apart from Guar Gum, Company has spread its wings across multiple business lines which includes commodity arbitrage, Food Industry, treasury and renewable energy sources such as Wind and Solar Parks of around 140 MW in India.
- Company has multiple business lines in United States which includes sand mining, water treatment equipments and mineral rights of hydrocarbons.

RAJLAXMI GROUP

- Manufacturer & Exporter of Stainless Steel Utensils, Cookware, Copper Bottom, Sandwich Bottom, Dinner Set & Household utensils.
- Specialized in Cookware, Kitchenware, Hotel ware, Flatware, Trays, Life Style Products.
- 'Rajlaxmi' 'Rajat' and 'Steelcraft' are highly reputed brands in India with an impressive image in the domestic market.
- We are vertically integrated organization, having expertise in manufacturing to marketing.

ABOUT THE COMPANY

VISION

To produce Innovative and Eco-friendly product for the global masses through technological advancement. We take immense pride in introducing ourselves as the first successful manufacturer of vacuum insulated stainless steel water bottles and flasks in India. We are committed to differentiate ourselves by using environment friendly materials present in India throughout the process of making these bottles. The company is also determined to support the community by sourcing all our raw materials locally and keeping the entire manufacturing process in India. With this at heart, we at Nanobot have aimed to maintain 100% compliance with the 'Make in India' goals. All our insulated bottles and flasks are made with high-quality 304-grade stainless steel, which is regarded as being one of the corrosion-resistant food-grade material.

QUALITY PARAMETERS AND TRUST :

- We make very high mirror type of inner electroplishing to prevent drinks from losing their thermal properties as well as restricting contamination caused due to continuous usage.
- True vacuum technology encompasses brazing done in closed chambers in a vacuum state incorporated by high level suction multiple pumps.
- Color bottles are designed with powder coated technology in isolated oven to avoid contamination and color leakage.
- Rigorous testing at each process for maximum efficiency.
- High micron copper coating leading consistent shiny uniformity for higher degree of radiation reflection.

PRODUCT DESCRIPTION :

Our bottles are broadly classified as double wall and single wall bottles. The single-walled bottles are the regular stainless steel fridge bottles - light-weight, durable and easy to carry. On the other hand, the double-walled bottles are weather-proof containers that keep your Cold Drinks-Cold for 24 hours and Hot Drinks Hot for up to 24 hours. The double-walled bottles are designed in a way that keeps them sweat-free.

All the bottles are engineered to be completely leak-proof, which makes them ideal for traveling purposes. Stepping further, we have also ensured that our stainless steel bottles are 100% BPA free and are manufactured using the safest and proven materials. To suit individual needs, our bottles come in different capacities ranging from 350ml to 1800ml. Our Therma serves as a perfect hot beverage companion whereas Kryo serves as a chilling cool other half. Single layer range covers the complete spectrum of fridge bottle to sports bottle. Our products come in a wide scale of premium colors.

Why Nanobot

ORDINARY BOTTLES ❌

TRADITIONAL COPPER PINCH WELDING
Copper pinch is a very conventional technology comprising of welding two bottles without closed chambers. It can get easily damaged by a free fall which may causes insulation failure

nanobot® ✅

VACUUM BRAZED INSULATION TECHNOLOGY
Brazed with sealing material in vacuum conditions with smooth surface. Regular fall cant effect the insulation.

SILVER FOIL WRAPPED INNER WALL
Conventional method of inner wall wrapped with silver foil doesn't give uniform insulation for a longer period.

COPPER COATED INNER WALL
Copper coating prevents heat radiation entering into bottle. High grade copper coated inner wall provides uniform insulation from top to bottom.

LACQUER COLOR FINISH
Lacquer color dulls over time. Daily usage leads to chipping of color layer.

POWDER COATED COLOR FINISH
Powder coating forms a color layer which penetrates into steel surface making it hard to remove in rough usage.

IMPORTED
Imported from foreign countries which in turn let them gain revenue from India.

INDIAN ORIGIN
Nanobot bottles are proudly Made in India.

SS 201 GRADE STAINLESS STEEL
Grade 201 has less than 8% Nickel and less than 18% chromium leading to rust and crack easily.

SS 304 GRADE STAINLESS STEEL
Grade 304 doesn't easily cracks & rusts as it has 18% Chromium and 9% Nickel in standard. Nanobot vacuum insulated flasks are SS 304 grade from cap to bottom.

BASIC ELECTRO POLISHED INNER
Basic electro polishing leaves stain in inner wall. In addition to that it doesn't retain fresh odour of the beverage.

FINE ELECTRO POLISHED INNER
Fine electro polishing gives shiny finished inner wall. It also preserves fresh odour of the beverage.

NO REPLACEMENT
No replacement on insulation failure caused due to dent

1 YEAR REPLACEMENT
Nanobot provides 1 Year replacement warranty on insulation failure.

What is

TRUE VACUUM
TECHNOLOGY

|| 2 ||
DOUBLE LAYER
TRUE VACUUM

TRUE VACUUM TECHNOLOGY

Our true vacuum technology encompasses two chamber high vacuum insulation chambers with very high performing multiple pumps to evacuate air and achieve high degree of vacuum insulation.

Insulation works on the principle of resisting three modes of heat Transfer. Heat loss due to convection and conduction is prevented By vacuum insulation. Heat transfer caused by radiation is Controlled by dual technology of electrolysis and copper coating.

INSULATION WARRANTY

First time in India, vacuum insulated (hot and cold) bottle 100% Made In India. If the vacuum insulation fails (the beverage does not stay hot or cold) due to a fall within one year (365 days) after purchase, we will replace the bottle. Note: There must be no holes in the body of the bottle. If a bottle is punctured, it will not be replaced.

INSULATION WARRANTY

First time in India, vacuum insulated (hot and cold) bottle 100% Made In India. If the vacuum insulation fails (the beverage does not stay hot or cold) due to a fall within one year (365 days) after purchase, we will replace the bottle. Note: There must be no holes in the body of the bottle. If a bottle is punctured, it will not be replaced.

NO SWEAT

Ever wonder why some water bottles sweat? Well, when air comes in contact with a cold non-insulated bottle it begins to cool down. If it cools enough, water vapor in the air is condensed and turns to liquid that beads up on the outside of the bottle. With a Nanobot vacuum insulated bottle, this doesn't happen. The outside of the bottle just doesn't get cold enough, keeping water rings off your table or contents of your bag from getting wet with bottle sweat.

-  KEEP IT HOT, KEEP IT COLD
-  NO SWEAT
-  BPA FREE
-  VACUUM INSULATED
-  ELECTROLYSED INNER

1
SINGLE LAYER
HYDRO STEEL

Nanobot's Hydro Steel Bottles are single walled 100% stainless steel leak proof bottles. They are made from premium food grade stainless steel from cap to base. These bottles are ideal for kitchen, fridge, office, gym and sports. Inner side is fine electro polished leading to increased resistance to corrosion and preserving the freshness of the beverage. Exterior is matt finished for plain bottles. Color models are powder coated.

Note : They are not intended to keep liquid hot and cold for longer duration at room temperature. For that purpose please refer to earlier section of our catalogue.
